DETAILED ACTION

This action is in response to the response to election received on 20 April 2006 in which Species V, Subspecies I comprising claims 1, 8-9 was elected. Claims 1-12 are allowed.

Reasons For Allowance

The following is an examiner's statement of reasons for allowance: The instant application is deemed to be directed to a nonobvious improvement comprising: an electret condenser microphone having a side wall and a cover board affixed to a surface of the back electrode board facing away from the diaphragm so that the cover board and the back electrode board form a complex front board arrangement for the microphone; wherein the complex front board arrangement has a connecting path at an interface including opposing surfaces of the cover board and the back electrode board, wherein the connecting path extends perpendicular to axes of first and second through-apertures formed in the back electrode and cover board respectively, and is connected to the first and second through-apertures, whereby the electret film communicates with the outside through the connecting path and the first and second through-apertures, and an ingress of grit from the outside to the electret film is suppressed by the connecting path, as substantially connected and described in the other functional language recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

2005/0089180 A1 (Saeki et al) pertinent to condenser microphones fails to teach a connecting path.

US 5272758 (Isogami et al) pertinent to condenser microphones fails to teach a connecting path.
